Delivering the Best in DME Fulfillment:

IMMEDIATE DELIVERY. BEST PRICES. EXTENSIVE INVENTORY

Preferred Industries was founded in 1996 by a focused team with 50 years of entrepreneurial experience. This expertise spawned a number of successful ventures including clinics, pharmacies, strategic industry investments, research and development and launched numerous medical products. This experience across a broad spectrum of the medical industry over the decades uncovered a new opportunity - to provide a streamlined distribution channel between manufacturers and end-users.

With the addition of the Preferred Industries' Nashville Distribution Center, we are able to acquire a wide range of products for our customers that are available on-demand without the need to meet large minimum order quantities. Our on-demand model helps customers avoid costly inventory mistakes while providing cost-effective operational solutions. This not only provides financial relief from inventory debt or asset allocation, it also improves customer cash flow and positively impacts the bottom line.

Operational services include pick/pack/ship, cross-docking and direct to customer delivery systems, affording our customers the freedom to focus on revenue and growth strategies. Our product sourcing capabilities and industry expertise continue to identify market trends and expansion opportunities.

The benefits provided by our on-demand inventory distribution model include:

- Immediate startup to fulfill incoming orders
- Access to shipping and distribution solutions for a wide range of products without the need to meet minimum order quantities
- On-demand inventory supports fluid business growth objectives while avoiding costly inventory investments
- Immediate access to lower product costs and higher margins
- Reduced operational and capital investments - IT, warehouse, staffing and logistics

By leveraging and sharing the industry expertise and operational capabilities of a larger organization our customers are free to focus on growth strategies.

Industries we serve include warehousing and fulfillment of durable medical equipment (DME), OTC products and other medically related items.

INJURY SOLUTIONS

Orthopedic products designed to support while working with the body's natural shape and movements in order to help speed recovery.

Based on decades of biomechanical experience, ISO Preferred and DR Medical's injury solutions are designed to supplement existing treatment options. Our expertise in this sector has produced orthopedic products that rival global corporate brands in quality and ease of use.

Aiming to enhance the natural healing process of bone and soft tissue injuries, our products cover trauma, post-operative and preventative care, enabling the body to heal while maintaining function and mobility.

Cervical Bracing

ISO Preferred and DR Medical Cervical Bracing is designed specifically to support your neck and spinal cord as well as limit the movement of your neck and head while you recover from an injury, surgery, or neck pain.

Rigid or soft, our cervical bracing promise a secure, comfortable fit that will allow the muscles of your neck to relax, reducing tension on the injured area.

Cervical Collar: Universal Shown

Cervical Collar: Universal

HCPCS: L0180

MODEL #: ISO-NE368

The *ISO Preferred Cervical Collar: Universal (NE368)* provides adjustable support and stability to the occipital and mandibular areas to successfully manage or eliminate mobility concerns. The collar is a lightweight design that is vented to improve air flow. The Brace features a multi-point adjustment system that is designed to reduce the time it takes to heal discomfort from injuries or post-surgery. The distinctive adjustment and strapping system allow the brace to fit a wide range of patients.

FEATURES

- Universal Sizing
- Lightweight Vented Design
- Tracheal Opening
- Anterior/Posterior Adjustments for Complete Immobilization
- Adjustable Anterior Height
- Adjustable Upper/Lower Posterior (Occipital) Immobilization
- Removable Interior Foam Cushioning
- Hand Washable

INTENDED FOR

Immobilization of the Cervical Spine after Operative Surgical Fracture, Halo removal, Spinal Stenosis, Arthritis and post-trauma use; Cervical spine precaution for trauma patients, immobilization for pre- and post-spine surgery. Degenerative disorders, Spondylolisthesis, Ligament/muscular injuries, Rheumatoid arthritis, Degenerative joint disease, and Nerve impingement. It features easy-on/off by the patient, with the unique adjustment dials for the upper and lower circumference fittings.

SIZING INFORMATION

SKU	SIZE
ISO-NE368	Universal Size
	Fits mid-neck circumference of 15" - 20"

Cervical Orthosis

HCPCS: L0180

MODEL #: NB-161

The *DR Medical Cervical Orthosis (NB-161)* features a lightweight, breathable design that is adjustable to fit most wearers. Featuring a dual-post anterior mount allowing for adjustable extension and flexion positions, the DR Medical Cervical Orthosis allows for multi-adjustment fitting. Indications for use include cervical spine immobilization, spinal stenosis, arthritis, whiplash, herniated disk and post trauma wear.

FEATURES AND BENEFITS

- Universal design fits most wearers
- Lightweight and breathable for extended wear and comfort
- Ridged dual-post design for maximum adjustment and fitting

NB-161	Universal Size

Cervical Collar

HCPCS: L0174

MODEL #: ISO-NE36x

The *ISO Preferred Cervical Collar (NE36x)* is designed to treat various conditions related to cervical pain, fractures, and muscle weakness. Constructed of light-weight, pre-formed foam with semi-rigid plastic front reinforcements, extending to the thoracic region for support of the cervical spine. 2-piece design allows for easy application and adjustment. Front section features a large trachea opening for quick access to pulse monitoring. The NE36x uses an advanced design to provide stability for the cervical spine and reduce neck pain while providing comfortable support and a low-profile fit.

FEATURES

- Made of closed cell foam material
- An anterior hole for a tracheostomy is available
- Hand Washable

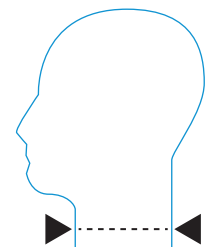

INTENDED FOR

Post-operative, Cervical fractures or strain, Herniated disc, Muscle weakness/Whiplash, Halo removal, Anterior cervical fusion Dens type I cervical fracture of C2, Anterior discectomy, Suspected cervical trauma in unconscious patients, Tear-drop fracture of the vertebral body (Note: Some tear-drop fractures require anterior decompression and fusion).

The ISO Preferred Cervical Collar comes in 4 sizes. The sizes are measured by the circumference of the neck.

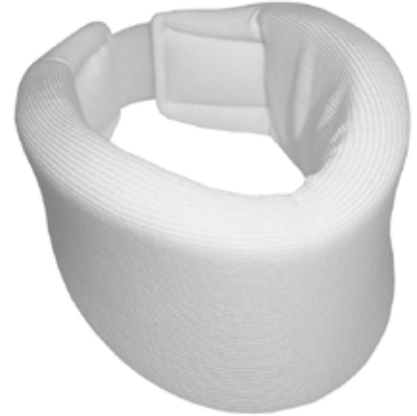

Foam Cervical Collar Wrap

HCPCS: L0120

MODEL #: ISO-NE37x

The *ISO Preferred Foam Cervical Collar Wrap (NE37x)* provides healing support by reducing head and cervical vertebrae movement. The foam collar wrap is designed using medium density PU foam construction with a breathable polyester soft stockinette cover and is lightweight for optimum comfort and support. A contour design under the chin supports the head in a neutral position and helps heal the neck after an injury and prevents further injury from occurring. The ISO-NE37x is flexible, easy to apply and adjust for a comfortable fit..

FEATURES

- Breathable polyester soft stockinette cover
- Medium density PU foam construction
- Contour design keeps head in a neutral position
- Lightweight and flexible for optimum comfort and support
- Easy application with advanced gripping material on strap to secure
- Hand Washable

INTENDED FOR

Cervical sprains and strains, Cervicalgia (pain in neck), Cervical spondylotic myelopathy (CSM), Whiplash injury caused by hyperextension and hyperflexion of cervical spine, Cervical osteoarthritis, Neck pain and discomfort.

Elbow and Shoulder Bracing

Whether you stay in shape playing tennis or your job requires physical labor, your lifestyle can take a toll on your elbows and shoulders.

Shoulder and elbow injuries can happen on impact while you're playing sports, have an accidental fall, and even from overuse. If you feel pain in your shoulder or elbow, rehabilitation often begins with resting and immobilizing your shoulder or elbow with a brace or sling.

Using a high-quality ISO Preferred and DR Medical brace will help give your shoulder or elbow extra support while helping minimize the movement. Our innovative products are lightweight, comfortable, easy to wear and apply, and trusted by doctors and patients from all walks of life.

Elbow PO ROM Brace Shown

Elbow PO ROM Brace

HCPCS: L3760/L3761

MODEL #: ISO-EL205x

The *ISO Preferred Elbow PO ROM Brace (EL205x)* provides stability and support to treat an elbow injury or post-surgery in which a limited range of motion is required. Hinge is adjustable and will lock in place at selected Range of Motion (ROM) settings. Brace's universal sizing is ordered specifically for the right or left arm and includes an adjustable length on the upper and lower arm to fit most arm lengths. Moisture-wicking liner and adjustable straps hold the brace in place. Lightweight construction allows the brace to be used in place of a cast or splint and is designed for longer periods of wear without discomfort reducing the time it takes to heal.

FEATURES

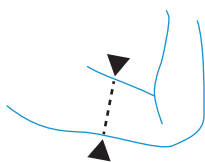

- Immobilization or fix the elbow in 15° incremental settings
- Padded shoulder strap to release the pressure around shoulder
- Telescoping length adjustments on upper and lower arm
- Easy “Press and Rotate” hinge with lock
- Lightweight design
- Universal sizing
- Extension limitation from 0° ~ 60°
- Flexion limitation from 0° ~ 120°
- Flexion from 0° ~ 60°
- Inner Padding
- Hand Washable

INTENDED FOR

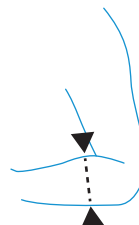

Post-operative immobilization or ROM control for the elbow, Conservative treatment of elbow or shoulder dislocation or luxation, Stable or internally fixed fractures of the distal humerus or proximal radius or ulna tennis elbow release, Rupture of tendon in elbow, Cubital tunnel syndrome, Elbow hyper extension, Chronic elbow injuries, Elbow fractures, Ligament/tendon injuries or repairs, Distal biceps tendon repair and Tommy John surgery.

SIZING INFORMATION

SKU	SIZE	SKU	SIZE
ISO-EL205L	Universal Left	ISO-EL205R	Universal Right

The ISO Preferred ISO-EL205x Elbow PO ROM Brace is a universal size brace that comes in a left or right arm model. It provides additional length adjustments on the upper and lower arm to accommodate shorter or longer fit requirements.

The ISO Preferred Locking Elbow Brace comes in one universal size. It has a maximum working size for up to:

Bicep: Max 20" bicep circumference
Forearm: Max circumference of widest part of the forearm of 15"

Elbow Reinforcement w/O Joints

HCPCS: L3762

MODEL #: ISO-EL210

The *ISO Preferred Elbow Reinforcement w/O Joints (EL210)* is an elbow orthosis, rigid, without joints and is primarily intended for Cubital tunnel syndrome pain and Compression of the Ulnar nerve at the elbow. It is designed to keep the elbow in an approximately straight position. This position keeps the Ulnar nerve relaxed where it is not in compression/tension. Other conditions it may be used for are Post op application, Post cast removal, Tennis and golfer's elbow and other elbow instabilities. The brace is universal sized and fits both left and right elbows. It is generally used at bedtime, but can be worn at any time.

FEATURES

- Aluminum malleable stays positioned inside of elbow to prevent excessive elbow flexion
- Apply to left or right elbow
- Universal sizing
- Lightweight construction
- Easy application with adjustable advanced hook and loop system with buckles to secure
- Hand Washable

INTENDED FOR

Cubital tunnel syndrome, Compression of the Ulnar nerve, Post op application, Post cast removal, Tennis elbow, Golfer's elbow, Other elbow instabilities.

Clavicle Strap I

HCPICS: L3650

MODEL #: ISO-SH20x

The *ISO Preferred Clavicle Strap (SH20x)* shoulder orthosis is a figure-of-eight design abduction restrainer intended for Clavicle (collarbone) fractures, Grade II/III Acromioclavicular separations, Postural support and weakness of the clavicle. The brace is designed using PP fabric construction with moisture-wicking abilities and has a comfortable pad on the back and features three (3) adjustable O-Rings allowing maximum adjustability of the shoulder straps and the brace height, and is secured in place by advanced hook and loop fastening material. The Clavicle Strap I is available in two sizes, S/M and L/XL to provide maximum comfort and proper immobilization for all day use.

FEATURES

- Adjustable O-Rings for maximum adjustability
- Different sizes available for optimum patient fit
- Lightweight construction
- Easy application with advanced gripping materials on straps to secure
- PP fabric with moisture-wicking abilities
- Hand Washable

INTENDED FOR

Clavicle (collarbone) fractures, Grade II/III Acromioclavicular separations, Postural support, Weakness of the clavicle.

Shoulder Sling w/ Abduction Pillow & Squeeze Ball

HCPCS: L3670

MODEL #: ISO-SH324-27

The ISO Preferred Shoulder Sling with Abduction Pillow & Squeeze Ball (SH324-SH327) is designed to provide post-operative and post-trauma immobilization. Canvas type fabric of the ISO shoulder sling orthosis firmly attaches to the abduction pillow for optimum arm and shoulder placement and immobilization. Design supports the needs for post-op, general injuries, rotator cuff injuries, soft tissue repairs, and shoulder instabilities. Shoulder sling and abduction pillow fit either the left or right arm or shoulder with an easily adjustable sling. Attached squeeze ball helps stimulate blood flow while arm and shoulder are firmly supported.

FEATURES

- Soft velour material
- Comfortable high density foam pillow provides more support
- Quick release buckle makes it easy on and off
- Padded straps
- De-rotational shoulder strap hold arm in place
- An exercise ball facilitates hand function and stimulates circulation
- Hand Washable

INTENDED FOR

Immobilization after rotator cuff repair or shoulder girdle fracture, Shoulder dislocation/subluxation, Capsular shifts, Bankart repairs, Glenohumeral dislocation/subluxations, Soft tissue repairs/strains, Multidirectional instability of shoulder, Adhesive capsulitis release/manipulation.

SIZING INFORMATION

ISO-SH325	Medium	11.5"-12.5"
ISO-SH326	Large	13"-14"
ISO-SH327	X-Large	14.5"-15.5"

The ISO Preferred Immobilization Shoulder Sling comes in 4 sizes. The sizing choice is determined by the length of the arm in inches.

Measure inches from center of palm to elbow.

Shoulder Pillow & Ball

HCPCS: L3670

MODEL #: SS-158

The *DR Medical Shoulder Pillow and Ball (SS-158)* is a soft-canvas type fabric sling that attaches to the abduction pillow to provide essential immobilization and support for arm and shoulder placement. Designed for post-operative support and post-trauma immobilization, this brace is intended for general injuries, post-op care, rotator cuff injuries, soft tissue repairs and injuries as well shoulder instabilities. The brace will fit left or right side with easily adjustable shoulder and waist straps. The attached squeeze ball helps stimulate blood flow while the shoulder and arm are supported firmly in the cradle of the brace. Size is universal.

FEATURES AND BENEFITS

- Universal size to fit most patients.
- Ergonomic, high density foam pillow designed to provide maximum comfort.
- Can be worn on left or right shoulder.
- Lightweight design provides comfort for extended wear.
- Stress ball provided for use in helping to stimulate blood circulation without arm or shoulder movement.

INDICATIONS

- Shoulder instabilities
- Rotator cuff repairs
- Bankart repairs
- Glenohumeral dislocations
- Soft tissue repairs of the shoulder

Immobilizer Shoulder Sling

HCPCS: A4565

MODEL #: ISO-SH320-23

ISO Preferred Immobilizer Shoulder Sling (SH320-SH323) is designed to support and immobilize the arm and shoulder after rotator cuff injury/repair, shoulder girdle fracture, and shoulder dislocation/subluxation.

FEATURES

- Breathable, durable material for arm rest
- Padded cotton shoulder strap and waist strap with velour lining
- Envelope style with thumb support
- Hand Washable

INTENDED FOR

Immobilization after rotator cuff injury/repair or shoulder girdle fracture, Shoulder dislocation/subluxation, Shoulder instabilities, Anterior dislocation (G-H joint)

SIZING INFORMATION

The ISO Preferred Immobilization Shoulder Sling comes in 4 sizes. The sizing choice is determined by the length of the arm in inches.

Measure inches from center of palm to elbow.

Airplane Shoulder Brace with Abduction

HCPCS: L3960

MODEL #: ISO-SH400

The *ISO Preferred Airplane Shoulder Brace w/Abduction (SH400)* is a fully configurable shoulder, elbow, wrist and hand brace to support either arm in an elevated and extended position. The airplane design arm elevation is supported at 0, 15, 30, 60 and 90 degrees with a wedge-shaped abduction cushion that can be positioned to achieve proper elevation. Configurable straps on the upper and lower arm, shoulder and waist secure the arm in position on left or right side. Belts and straps can be trimmed to fit size Small to 2XL.

FEATURES

- Ambidextrous design fits left or right arm
- Abduction elevation at 15, 30, 60, and 90 degrees
- Moveable under arm wedges for elevation
- Removable hand rest
- Location adjustable shoulder and waist straps
- Size adjustable shoulder and waist straps
- Shoulder strap secures in place
- Trimmable straps to fit wide range of sizes
- Torso and shoulder padding
- Advanced gripping materials system
- Hand Washable

INTENDED FOR

Is a universal size and is intended to provide immobilization support after Rotator cuff repair, Shoulder girdle fracture, Shoulder instabilities, Adhesive capsulitis release/manipulation, Multidirectional instability of the shoulder, Frozen shoulder, Arthritis of the shoulder, Median, ulnar and radial neuropathy; Elbow and shoulder injuries/tears; Trauma/Strain injury, Fractures; stroke and CVA recovery and residual hemiparesis.

Shoulder Abduction System

HCPCS: L3960

MODEL #: SS-154

The *DR Medical Shoulder Abduction System (SS-154)* is an airplane shoulder brace designed to keep the arm elevated at 0, 15, 30, 60 and 90 degrees, using a wedge-shaped abduction cushion. The brace is fully configurable to support the shoulder, elbow, wrist and hand in either an elevated or extended position. All straps are adjustable along the upper and lower arm, shoulder and waist to secure the arm or shoulder on either the left or right side. Brace is sized universal with straps and belts that can be trimmed to fit Small to 2XL.

FEATURES AND BENEFITS

- Universal size to fit most patients.
- Dual removable wedges providing multiple shoulder positioning at 0°, 15°, 30°, 60°, and 90°.
- Can be worn on left or right arm.
- Lightweight design provides comfort for extended wear.
- Extendable arm-bar for a comprehensive fit for most wearers.

INDICATIONS

Arthritis of the shoulder or hand, radial neuropathy, ulnar neuropathy, median neuropathy, brachial plexus lesion, cumulative trauma, repetitive strain injury, brachial neuritis radiculitis, adhesive capsulitis of the shoulder.

Lumbar Bracing

Lumbar support no longer means wearing a simple back brace.

In order to fully support the lower back and core, a Lumbar brace needs to conform and provide support to the wearer's body at multiple points from the structures of the lower back, including the intricate muscles and bones of the lower back and from the spine to the abdominal wall. If the lower lumbar is damaged, or put under constant stress, it can lead to pain and stiffness. In time that can lead to difficulty walking, or even to paralysis.

ISO Preferred and DR Medical Lumbar Braces provide an excellent way to provide additional support for the lower back. Our heat moldable back plates help to stabilize and protect affected areas of the back and spine after surgery, or following an accident, injury or strain. ISO Preferred and DR Medical Lumbar Braces effectively provide injured areas the means to recuperate by minimizing the stress and strain normally put on the back during regular daily activities.

Lumbar Back Brace IV Shown

Lumbar Back Brace III

HCPCS: L0630/L0643

MODEL #: ISO-BA203

The ISO Preferred Lumbar Back Brace III (BA203) features a Back Plate shaped to conform to natural body contouring from the sacrococcygeal junction to the T9 vertebra. Universal fit and padding of the wrap-around design combines a heat moldable rigid back plate with an abdominal support panel. Brace uses an adjustable string and roller system that perfectly supports the lower back and core muscle while allowing for pendulous abdominal placement. Universal sized waist belts can be trimmed to fit Small to 2XL or can be combined with an optional belt extension to fit larger sizes.

FEATURES

- Rigid back plate
- Abdominal support panel
- Heat moldable Back Plate
- String and Roller System
- Advanced Gripping Material
- Inner pocket for hot/cold pack
- Optional belt extension (not included)
- Hand Washable

INTENDED FOR

Has a heat moldable posterior panel. It is intended to provide support for the Sacrococcygeal junction to the T9 vertebra and supports conditions such as mild disc herniation of the lumbar, strain or sprain of the lower back, Spondylosis, Spondylolisthesis and Lumbago.

SIZING INFORMATION

SKU	SIZE
ISO-BA203	Can be configured to fit size S to 2XL. Maximum waist is 56".

ACCESSORY

SKU	DESCRIPTION
ISO-BA202	Lumbar Belt Extension: Universal (Requires 2) Maximum waist is 74"

For larger waist, use ISO accessory item, ISO-BA202 LUMBAR BELT EXTENSION: UNIVERSAL. Brace requires 2 belt extensions. Each will add up to 9" to the waist for a total of up to 18 additional inches on the waist.

Lumbar Back Brace IV

HCPCS: L0627/L0642

MODEL #: ISO-BA204

The *ISO Preferred Lumbar Back Brace IV (BA204)* features a Back Plate shaped to conform to natural body contouring from the L1 to the L5 vertebra. Universal fit and comfortable padding of the wrap-around design combines a heat moldable rigid back plate with an abdominal support panel. Brace uses an adjustable string and roller system that perfectly supports the lower back and core muscle while allowing for pendulous abdominal placement. Belts can be customized and trimmed to fit Small to 2XL or can be combined with an optional belt extension to fit larger sizes.

FEATURES

- Rigid back plate
- Abdominal support panel
- Heat moldable Back Plate
- String and Roller System
- Advanced Gripping Material
- Optional belt extension (not included)
- Hand Washable

INTENDED FOR

Has a heat moldable posterior panel. It is intended to provide support for the L1 to L5 vertebra for conditions such as mild disc herniation of the lumbar, strain or sprain of the lower back, Spondylosis, Spondylolisthesis and Lumbago.

Lumbar Back Brace V

HCPCS: L0631/L0648

MODEL #: ISO-BA205

The ISO Preferred Lumbar Back Brace V (BA205) features a Back Plate shaped to conform to natural body contouring from the sacrococcygeal junction to the T9 vertebra. Universal fit and comfortable padding of the wrap-around design combines a heat moldable rigid back plate with a rigid abdominal support panel. Brace uses an adjustable string and roller system that perfectly supports the lower back and core muscle while allowing for pendulous abdominal placement. Belts can be customized and trimmed to fit Small to 2XL or can be combined with an optional belt extension to fit larger sizes.

FEATURES

- Rigid Back Plate
- Rigid Abdominal Support Panel
- Heat moldable Back Plate
- String and Roller System
- Advanced Gripping Material
- Optional belt extension (not included)
- Hand Washable

INTENDED FOR

Disc herniation of lumbar spine, Strain or sprain over low back, Spondylosis, Spondylolisthesis, Lumbago, Spinal stenosis, Facet syndrome, Burst fracture and Post-Op disc surgery.

SIZING INFORMATION

SKU	SIZE

Lumbar Back Brace VI

HCPCS: L0637/L0650

MODEL #: ISO-BA206

The ISO Preferred Lumbar Back Brace VI (BA206) features a Back Plate combined with rigid Front and Lateral Support Panels. The heat-moldable rigid Back Plate is shaped to conform to natural body contouring from the sacrococcygeal junction to the T9 vertebra. The rigid lateral and front panels help provide stable intracavitary abdominal pressure and thus reduce the load on the intervertebral discs and help provide better tissue healing after injuries around the lower back. The universal fit and padding of the wrap-around design combines a rigid back plate with a rigid front panel to provide Lumbar-sacral support and Sagittal control. The brace uses an adjustable string and roller system that perfectly supports the lower back and core muscle while allowing for pendulous abdominal placement. The universal sized waist belts can be trimmed to fit Small to 2XL or can be combined with an optional belt extension to fit larger sizes.

FEATURES

- Rigid Back Plate
- Rigid Abdominal Support Panel
- Heat Moldable Back Plate
- Removable Rigid Lateral Panels
- String and Roller System
- Advanced Hook and Loop Fastening
- Optional Belt Extension (not included)
- Hand Washable

INTENDED FOR

Disc herniation of the lumbar, strain or sprain of the lower back, Spondylosis, Spondylolisthesis, Lumbago, Spinal Stenosis, Facet Syndrome, Burst fracture, and Post-op disc surgery, Post surgery or fracture, Degenerative disc disease, Strain or sprain over the low back.

LSO Back Brace w/Front Panel

HCPCS: L0639/L0651

MODEL #: **BB-159**

The DR Medical LSO Back Brace w/Front Panel (BB-159) is a jacket-type lumbar-sacral orthosis with sagittal-coronal control, and features comfortable padding and a universal fit. The wrap-around design encircles the trunk with overlapping edges and stabilizing closures to ensure secure placement of the anterior and posterior 15" rigid panels. The rigid posterior panel provides natural contouring to support the lumbar area from the sacrococcygeal junction to the T9 vertebra. The rigid anterior panel provides support from the symphysis pubis to the xiphoid process, producing intracavitary pressure to reduce the load on the intervertebral discs. The brace uses an adjustable string and roller system that perfectly supports the lower back and core muscles while allowing for pendulous abdominal placement. The brace is designed to provide better tissue healing after injuries around the lower back and can be used before and/or after surgery. The brace is universal size and the belts can be trimmed to fit sizes XS to 2XL, or can be combined with optional belt extensions (ISO-BA202) to fit larger sizes.

FEATURES AND BENEFITS

- Lightweight, low profile LSO design
- Universal fit Small to 2XL
- Rigid 15" overlapping back (posterior) panel
- Rigid 15" overlapping front (anterior) panel
- String & roller system
- Adjustable advanced hook and loop system to secure
- Optional belt extensions (not included)
- Hand Washable

INDICATIONS

Acute & chronic low back pain/strain, Spinal stenosis, Spondylolisthesis, Disc herniation and degeneration, Osteoporosis, Osteoarthritis, Compression fractures, Pre and Post operative support, Immobilization of the thoracic & lumbar spine.

SIZING INFORMATION

SKU	SIZE
BB-159	Can be configured to fit size S to 2XL. Maximum waist is 56".

The Solace LSO

HCPCS: L0637/L0650

MODEL #: **BB-157**

The *DR Medical Solace LSO Lumbar Brace (BB-157)* features rigid Front and Back plates, with Lateral Support Panels. The brace is designed to conform to natural body contouring and the Back Plate can be heat-molded for a more customized fit. The brace extends from the sacrococcygeal junction to the T9 vertebra. Intracavitary abdominal support is enhanced by the rigid side (Lateral) and Front panels, helping to reduce the load on the intravertebral discs, thus contributing to improved tissue healing after injuries to the lower back. The wrap-around design with rigid Front and Back plates and padding, is designed to provide Lumbar-sacral support and Sagittal control. Using an adjustable pressure feature from the string and roller system, the brace perfectly supports the core muscle and lower back while allowing for a pendulous abdominal placement. Universal fit, the waist belts can be trimmed to fit Small to 2XL or, can be combined with optional belt extensions to fit larger sizes.

FEATURES AND BENEFITS

- Lightweight brace, great for extended wear.
- Breathable mesh fabric designed to keep patient comfortable.
- Removable lateral panels.
- Adjustable in size to fit most patients.
- Posterior panel is 14”.

INDICATIONS

Indicated for spinal stenosis, chronic back pain, post operative disk surgery, facet syndrome, spondylolisthesis, radiculopathy, degenerative disc syndrome, post operative lumbar fusion, spinal instability, osteoarthritis, herniated disk.

The Solace LSO Gen II

HCPCS: L0631/L0648

MODEL #: **BB-160**

The *DR Medical Solace LSO Gen II Lumbar Brace (BB-160)* features a wrap-around design with comfortable padding and a Back Plate shaped to conform to natural body contours from the sacrococcygeal junction to the T9 vertebra. The heat-moldable rigid back plate combined with a rigid abdominal support panel uses a string and roller system that perfectly adjusts to support the lower back and core muscle while allowing for pendulous abdominal placement. Universally sized, the belts can be customized and trimmed to fit Small to 2XL, or can be combined with optional belt extensions to fit larger sizes.

FEATURES AND BENEFITS

- Lightweight brace, great for extended wear.
- Breathable mesh fabric designed to keep patient comfortable.
- Adjustable in size to fit most patients.
- Posterior panel available is 14”.

INDICATIONS

Indicated for spinal stenosis, chronic back pain, postoperative disk surgery, facet syndrome, spondylolisthesis, radiculopathy, degenerative disc syndrome, post operative lumbar fusion, spinal instability, osteoarthritis, herniated disk.

TLSO with Adjustable Thoracic Support 17"

HCPCS: L0454/L0455

MODEL #: ISO-BA210

The ISO Preferred TLSO with Adjustable Thoracic Support (BA210) provides trunk support and motion restriction extending from the sacrococcygeal junction to above the T-9 vertebra. The 17" back plate combined with rigid Front and Lateral Support Panels provides intracavitary pressure to reduce load on the intervertebral disks and help provide better tissue healing. The shoulder straps attach to the height adjustable anterior thoracic support bar with quick release buckles making it easy to put on, adjust and remove. An Allen wrench with convenient T-handle is provided to easily shorten or lengthen the anterior thoracic support bar. The rigid lateral panels can be easily angled to provide the best possible fit for a variety of body structures. The TLSO can be used before or after surgery. The universal size is fully adjustable for sizes S-2XL (up to 56"), and can be expanded up to 74" with optional belt extensions, to accommodate a wide range of patients.

FEATURES

- Rigid front and back plate
- Heat moldable back plate
- Height adjustable anterior thoracic support bar
- Rigid lateral panels
- Advanced hoop and loop fastening
- Waist fit sizes up to 56"
- Optional belt extension
- String and roller system
- Hand Washable

INTENDED FOR

Sprains and strains of the thoracic region, Kyphosis secondary to osteoporosis, Osteoporosis, Spinal stenosis, Spinal compression fractures, Prophylactic use.

TLSO Flex w/Trunk Support

HCPCS: L0456/L0457

MODEL #: ISO-BA220

The ISO Preferred TLSO Flex w/Trunk Support (BA220) provides trunk support extending from the sacrococcygeal junction and ends just below the scapular spine. The 17" Rigid posterior plate combined with a soft anterior apron restricts gross trunk motion in the sagittal plane and produces intracavitary pressure to reduce load on the intervertebral discs. The padded shoulder strap system can be easily adjusted and is held in place with adjustable anterior chest straps fastened together by a quick release buckle. The back of the shoulder straps join together and continue down the center of the spine. This center strap can be adjusted to shorten or lengthen the strap utilizing the advanced hook and loop fastening to provide optimum fit. The rigid lateral panels can be easily angled to provide the best possible fit for a variety of patient body structures. The universal size is fully adjustable for sizes S-2XL (up to 56"), and can be expanded up to 74" with optional belt extensions, to accommodate a wide range of patients.

FEATURES

- Backpack style padded adjustable shoulder straps with quick release buckle in front
- Height posterior thoracic extension
- Rigid lateral panels
- Universal sizing S-2XL. Waist size up to 56"
- Optional lumbar belt extensions
- Advanced hook and loop fastening
- String and roller system
- Heat moldable posterior plate
- Hand Washable

INTENDED FOR

Sprains and strains of the thoracic region, Spinal Stenosis of the thoracic region, Displacement of the lumbar or thoracic intervertebral discs, Postural Kyphosis.

Hip Bracing

Created with a patient-centric design to provide unprecedented comfort, simplicity and support during post-operative hip rehabilitation or injury,

ISO Preferred and DR Medical Hip Bracing works to get a patient up and fully mobile in the shortest time possible. Developed with industry-leading standards and technologies, ISO Preferred and DR Medical Hip Braces include patient first details like an intimate fit, universal sizing, multiple motion control locking systems and lightweight construction for long term wear without discomfort.

Hip Brace with Flexion/Extension/Abduction Universal Shown

Hip Bilateral Brace with Flexion/Extension/Abduction

HCPCS: L1681

MODEL #: ISO-HI205

The ISO Preferred Hip Bilateral Brace with Flexion/Extension/Abduction (HI205) provides a combination of lumbo-sacral, lower extremity and hip and femur support using a customizable bilateral system of adjustments to fit specific needs of patient. Adjustments on each side of hip include adjustable adduction and abduction controls coupled with Flexion and Extension settings with internal rotation control. Brace is universal fit at waist with configurable fit at hips using strapping belts, vertical/horizontal placement configuration and various adjustments of component parts. Waist belt is adjustable to fit sizes Small to 2XL. (An optional waist extension panel is available to fit larger sizes).

FEATURES

- Universal fit
- Bilateral support
- Multi-point Adjustable length & girth (Hip, Waist, Thigh)
- Abduction/Adduction and rotation control for hip dislocations or fractures
- Flexion/Extension ROM adjustments in 20-degree increments
- Adjustable hip abduction & adduction settings
- Easily adjusted using included Allen wrenches
- Lightweight and breathable material
- Advanced gripping material
- Optional belt extension (not included)
- Hand Washable

INTENDED FOR

Combined Bilateral support for Lumbo-sacral area, hip, femur orthosis with adduction/abduction and internal rotation control; an additional support to lower extremity, to provide pelvic control, hip joint support and includes adjustable flexion/extension and abduction/adduction control on each side. Supports Mild to moderate hip osteoarthritis, Hip revisions and surgeries, Pre-Op and Post-Op support, and Anterior or posterior hip dysplasia.

Hip Brace with Flexion/Extension/Abduction: Universal

HCPCS: L1686

MODEL #: ISO-HI206

The ISO Preferred Hip Brace with Flexion/Extension/Abduction: Universal (HI206) supports placement on either left or right side and provides a combination of lumbo-sacral, lower extremity and pelvic control, and hip and femur support using a fully customizable system of adjustments to properly fit specific needs of patient. Adjustments include adjustable adduction and abduction controls coupled with Flexion and Extension settings and internal rotation control. Brace is universal fit at waist with configurable fit at hips using strapping belts, vertical/horizontal placement configuration and adjustable components. Belt is adjustable to fit sizes Small to 2XL with optional waist extension panel for larger sizes.

FEATURES

- Universal fit – Left or Right Side
- Multi-point Adjustable length & girth (Hip, Waist, Thigh)
- Abduction/Adduction and rotation control for hip dislocations or fractures
- Flexion/Extension ROM adjustments in 20-degree increments
- Adjustable hip abduction & adduction settings
- Easily adjusted using included Allen wrenches
- Lightweight and breathable material
- Advanced gripping material
- Optional belt extension (not included)
- Hand Washable

INTENDED FOR

Hip Orthosis, Abduction/adduction control of hip joint, Post-Op hip abduction/adduction, Post-Op and Pre-Op support, Hip Dysplasia, Arthroplasty, Hip revisions and surgeries, Additional support for lower extremity, Pelvic control, Hip joint support with adjustable flexion/extension and abduction/adduction control.

Knee Bracing

Top of the line quality, industry leading innovation and a comfortable fit without sacrificing mobility means that ISO Preferred and DR Medical Knee Bracing leads and never follows.

Designed for patients suffering from osteoarthritis, rheumatoid arthritis, meniscal injuries or seeking rehabilitative support from surgery, ISO Preferred and DR Medical Knee Bracing provides off-loading support, Range of Motion targeting and advanced moisture wicking materials for multifunctional use and dependability.

OA Reliever Brace Shown

KOA ROM Hinge Knee Brace

HCPCS: L1843/L1851

MODEL #: ISO-KN207x

The ISO Preferred KOA ROM Hinge Knee Brace (KN207x) is a single upright orthopedic hinged knee brace with adjustable rotational control for flexion and extension settings. Brace also provides a powerful lateral bracing system with unloading features for medial support to the knee. The KOA brace extends from the thigh to the calf and may be fitted off-the-shelf or customized by ordering physician. Lightweight and ergonomic design ensures superior fit. Universal size. Select left or right side. Optional Knee Suspension Sleeve (KN208) may be worn over or under the brace for additional support or comfort.

FEATURES

- Lightweight design with advanced unloading system
- 3-point leverage system - unloads medial compartment
- Unloading system reduces pressure on knee joint
- Unload feature promotes normal joint movement
- Strong lateral struts support the knee and help reduce pain
- Fully adjustable strapping supports universal fit
- Initial fit allows customizations for ROM, strapping system, valgus/varus adjustment
- Advanced gripping system for easy application
- Easy application and removal with quick-release snaps
- Optional knee suspension sleeve (not included)
- Hand Washable

INTENDED FOR

Intended for the support of Uni-compartmental osteoarthritis of the knee, rheumatoid arthritis, chondromalacia patella, degenerative meniscal tears, and collateral ligament protection.

The OA Reliever

HCPCS: L1843/L1851

MODEL #: **KB-138x**

The *DR Medical OA Reliever (KB-138x)* is a single upright hinged knee brace that provides added stabilization for knee strains, sprains, and small tears. The combination of medial and lateral support using the Varus/Valgus adjustments allow the brace to provide unloading features for medial support of the knee. The brace may be fitted off-the-shelf or by the patient's physician and is universally sized in left or right versions to fit most. This brace extends from the thigh to the calf and offers a lightweight contoured design to ensure both fit and function. Optional Knee Sleeve (KB-139) may be worn over or under the brace for additional support and comfort.

FEATURES AND BENEFITS

- Single lateral upright designed in conjunction with flex-hinge to unload the medial compartment of the knee, helping to promote normal joint movement and reduce pain
- Lightweight construction improves comfort for longer periods of wear
- Adjustable straps with free-flow buckles for superior comfort and fit
- Valgus and Varus adjustments to fit individual alignment
- Ideal for unilateral compartment OA knee users

INDICATIONS

Helps to relieve pain associated with ligament injuries of the ACL, PCL, MCL, LCL, and mild to moderate arthritis.

OA Dual Upright ROM Hinge Knee Brace

HCPCS: L1845/L1852

MODEL #: ISO-KN22xx

The ISO Preferred OA Dual Upright ROM Hinge Knee Brace (KN22xx) is a lightweight double upright knee orthosis with adjustable ROM hinges for flexion/extension and Varus/Valgus joint control. The solid metal double uprights provide medial/lateral control. Rotation control is provided by the solid metal on anterior portion of the thigh and calf cuffs in combination with the dual condylar pads at the knee joint. A tool set includes custom hinge stops to provide individualized flexion/extension settings. Models are left or right knee oriented and sizes are S to XL, allowing the brace to fit a wide variety of patients. The combination of controlled movement features helps reduce the time it takes to heal discomfort from surgery or injury and the lightweight open design allows for longer periods of wear without discomfort.

FEATURES

- Left and Right Knee models; Sizes S to XL
- Rotation control of the Thigh and Calf achieved through solid metal and condylar pads
- Flexion settings of 0, 10, 20, 30, 40, 50, 75, 90 degrees
- Extension settings of 0, 10, 20, 30, 40 degrees
- Easy Access ROM hinge adjustments
- Includes toolkit to install hinge stops
- Medial and Lateral Support helps reduce injury and assist recovery
- Varus/Valgus hinge adjustment
- Unicentric/Polycentric Hinges provide stability, controlled and free movement
- Covered, condylar hinges' Cushions at the hinges for comfortable fit
- Easy application with advanced gripping materials on straps to secure
- Optional knee suspension sleeve (not included)
- Hand Washable

INTENDED FOR

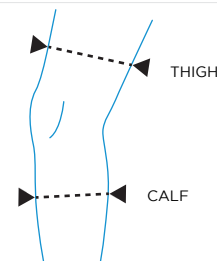

Provides stability for treating mild injuries of the Collateral ligaments, Menisci and Patellar retinaculum in addition to support and relief for Chronic knee pain or instability, Loose body in the knee, Cartilage or Meniscus tears of the knee, Sprains and strains of the knee and Old disruption of the anterior cruciate ligament. ROM hinges have Extension/-Flexion and Varus/Valgus control settings.

Dual OA Reliever

HCPGS: L1845/L1852

MODEL #: KB0104-147x-xx

The *DR Medical Dual OA Reliever (KB0104-147x-xx)* is a double upright knee orthosis with adjustable ROM hinges (flexion and extension settings) and medial/lateral (Varus/Valgus) joint control settings. The solid metal anterior cuffs on the thigh and calf are lightweight and in combination with the dual condylar pads at the knee joint, provide superior rotation control. The included tool set includes customizable hinge stops to provided individualized flexion/extension settings. This brace is specific to the Right or the Left knee and is sized from S to XL. The innate design for controlled movement helps reduce healing time and discomfort from surgery or injury. The sturdy, lightweight and open design accommodates comfort during extended periods of wear.

FEATURES AND BENEFITS

- Double upright designed in conjunction with flex-hinge to unload the medial and lateral compartments of the knee, helping to promote normal joint movement and reduce pain
- Lightweight construction improves comfort for longer periods of wear
- Adjustable straps with "free flow" buckles for superior comfort and fit
- Valgus and Varus adjustments to fit individual alignment
- Anti-slip padding provides for a more comfortable fit and increased wear ability

INDICATIONS

The Dual OA Reliever provides added stabilization for knee strains, sprains, and small tears. Helps to relieve pain associated with ligament injuries of the ACL, PCL, MCL, LCL, and mild to moderate arthritis.

OA Dual ROM Hinge Knee Brace

HCPICS: L1832/L1833

MODEL #: ISO-KN209

The ISO Preferred OA Dual ROM Hinge Knee Brace (KN209) is a knee orthosis with adjustable ROM hinges for rigid flexion/extension knee support. Polycentric hinge support provides positional adjustments for extension and flexion control to help reduce the time it takes to heal discomfort from injuries or post-surgery. Universal sizing incorporates a distinctive overlapping system, allowing the brace to fit a wide range of patients, sizes S to 2XL. Brace may be applied to either left or right knee. Optional Knee Sleeve (KN208) may be worn over or under the brace for additional support or comfort.

FEATURES

- Universal Size
- May be applied to Left or Right knee
- Medial and Lateral Support helps reduce injury and assist reCoverly
- Polycentric Hinges provide stability and free movement
- Covered, removable ROM hinges
- Easy Access ROM hinge adjustments
- Cushions at the hinges for comfortable fit
- Front closure for easy application
- Overlapping padded buttress isolates and supports the patella
- Lightweight construction
- Easy on-off wrap-around design
- Straps use advanced gripping material system to secure
- Optional knee suspension sleeve (not included)
- Hand Washable

INTENDED FOR

Provides stability for treating mild injuries of the Collateral ligaments, Menisci and Patellar retinaculum in addition to support and relief for Chronic knee pain or instability, Loose body in the knee, Chondromalacia, Chondromalacia of the patella, Internal derangement of the knee, Cartilage or Meniscus tears of the knee, Sprains and strains of the knee, and Old disruption of the anterior cruciate ligament. Comfortmax 360 Universal Hinged Knee Brace

HCPCS: L1820

MODEL #: **KB-159**

The DR Medical Comfortmax 360 Universal Hinged Knee Brace (KB-159) is designed to treat sprains, mild or moderate ligament pain, and strains of the knee. With medial and lateral hinges and dual condylar pads this brace has a tapered design and multi-directional stretch. The wrap-around design offers excellent knee support using upper and lower strapping without putting pressure on the knee. Functional dual support hinges, lightweight construction and sturdy design helps stabilize and align the knee to relieve pain and restore function. An optional Knee Sleeve (BB-139) may be worn over or under the brace to provide additional support and comfort.

FEATURES AND BENEFITS

- Universal wrap around design allows for exact fit and comfort.
- Provides for mild to moderate medial and lateral support in addition to the support offered by strapping.
- Universal size (one size fits most).

INDICATIONS

Indicated for mild to moderate ligament joint pain, sprains, and strains of the knee ligaments. Provides support, stabilization, and a compression of the knee joint following ligament or meniscus injuries.

OA Post-Op Dual Rom Knee Brace

HCPCS: L1832/L1833

MODEL #: ISO-KN340

The ISO Preferred OA Post-Op Dual Rom Knee Brace (KN340) is a rigid knee orthosis design to immobilize the post operative knee following meniscal and chondral defect procedures. This universal-size brace features extensive range of adjustments for flexion (0-120 degrees) or extension (0-90 degrees), as well as an immobilizing lock-position flexion setting at 0 to 75 degrees for full management of knee mobility. The telescoping upper and lower length adjustment and independent strapping system provide a customized four-point fit at the thigh and calf to fit nearly every size patient. The adjustable ROM hinge easily configures to prescribed flexion end extension controls and the quick-release straps make the brace easy to apply and release. The combination of rigid inner and outer frame and the controlled-movement features of the ROM hinge helps reduce the time it takes to heal discomfort from surgery or injury, and the lightweight open design allows for longer periods of wear without discomfort.

FEATURES

- Adjustable 3-way ROM hinge for flexion, extension and lock position
- Telescoping frame - upper and lower length adjustment
- Easy access ROM hinge adjustment requires no tools
- Rom hinge includes a lock position at 0, 15, 30, 45, 60, 75 degrees
- Flexion settings are 0-120 degrees in 10-degree increments
- Extension settings are 0-90 degrees in 10-degree increments
- Polycentric hinges provide stability, controlled and free movement
- Condylar hinge pads provide comfort and support at the hinge
- Open design keeps patients cool and dry over long periods of wear
- Easy application with advanced gripping materials on straps to secure
- Hand Washable

INTENDED FOR

Post-operative knee immobilization, Tears of cartilage or meniscus of knee, Injuries of the collateral ligaments, Chondromalacia, Internal derangement of the knee, Loose body in the knee, Old disruption of the anterior cruciate ligament, Sprains and strains of the knee. Effective in treating moderate to severe injuries of the collateral ligaments, menisci and patellar retinaculum.

Knee Immobilizer I

HCPCS: L1830

MODEL #: ISO-KN41XX

The *ISO Preferred Knee Immobilizer I (KN41xx)* is a knee orthosis recommended for patients who require complete knee immobilization. The three-piece design is fully adjustable to accommodate most leg shapes and sizes. Models fit left or right knee and are sized at 14", 16" 18" 20" and 24" - allowing the brace to fit a wide variety of patients with an optimum fit. Adjustable side aluminum stays and fixed posterior aluminum stays provide stability and keep the leg and knee in a protected straight position providing strong support and pain relief.

FEATURES

- Universal 3-panel design for custom fit
- 4 adjustable straps can be adjusted to accommodate most legs shapes and sizes
- Available in 14", 16", 18", 20" and 24" lengths
- Apply to left or right knee
- Different lengths available for optimum patient fit
- Lightweight construction
- Adjustable advanced hook and loop system to secure
- 2 adjustable side aluminum stays & 2 fixed posterior aluminum stays to provide stability
- 2 interior adjustable back cushion pads for comfortable fit
- Easy application with advanced gripping materials on straps to secure
- Hand Washable

INTENDED FOR

ACL, MCL, PCL, and LCL injuries, soft tissue injuries, Pre and Post-operative knee immobilization, Emergency immobilization, knee sprains, Other mild to severe knee and leg injuries.

ISO-KN208	Knee Suspension Sleeve

Knee Suspension Sleeve

HCPCS: L2397

MODEL #: ISO-KN208

The *ISO Preferred Knee Suspension Sleeve (KN208)* may be worn over or under an existing knee brace to provide additional support. The sleeve is applied directly to the knee before applying the brace or may be applied over the brace. The suspension sleeve also assists patients that frequently wear knee braces by providing an additional knee support, while improving comfort and helping to prevent the brace from moving. Universal size.

FEATURES

- Comfortable stretch fabric
- Easy-pull end tab to assist application
- Advanced gripping material to secure
- Apply under or over knee brace for additional support

INTENDED FOR

Uni-compartment OA patient, Mild to moderate OA knee user, Ideal for unilateral compartment OA knee users, Valgus and varus adjustment to fit individual's alignment and generally for additional support and comfort.

Ankle Bracing

ISO Preferred and DR Medical Ankle Braces provide the maximum external support to ankles whether being worn as a rehabilitative or preventive measure.

Each brace features comfort fitting, moisture wicking fabric, Left or Right design specificity and fully adjustable secure closures. Special features include calf high extensions. The ISO Preferred and DR Medical Air Walking Boot offers comfort, stability and performance using air compression inside a rigid frame to provide customized support. A pneumatic lining system in the boot features as-needed adjustments and provides variable compression adjustments. This helps to manage the support needs throughout the healing process.

Stable & Secure Ankle Brace | Shown

Stable & Secure Ankle Brace I

HCPCS: L1906

MODEL #: ISO-AN34x

The ISO Preferred Stable & Secure Ankle Brace I (AN34x) is a low-profile lightweight open boot-type brace featuring a front closure with an easy lacing structure. Designed to provide support and reduce the time it takes to heal discomfort from injuries or post-surgery. Brace combines a soft fabric surround with a rigid foot plate and comfortable padding and provides advanced stability and improved support for ankle injury treatment. Lightweight, low-profile support helps prevent abnormal ankle inversion, eversion, and rotation while offering natural, unrestricted plantar-flexion and dorsi-flexion movement.

FEATURES

- Anatomically-contoured supporting shell with hinge joint
- Hinge design for normal gait activity
- Rigid foot plate
- Adjustable advanced gripping material closure adjusts to swelling changes
- Figure-of-eight straps as ankle taping enhance inversion/eversion support
- Specifically for right or left by anatomical design
- Hand washable

INTENDED FOR

Mild to moderate ankle distortions, Tibialis Tendinitis, Osteoarthritis of ankle and foot, Chronic ankle instability, Tendinopathy of foot and ankle; Prophylactic and therapeutic use in sport activities. Rupture - tendon of the foot and ankle, non-traumatic. Acquired flat-foot or pronation of the foot/ankle.

Stable & Secure Ankle Brace II

HCPCS: L1971/L1906

MODEL #: ISO-AN35x

The ISO Preferred Stable & Secure Ankle Brace II (AN35x) features a configurable jointed rigid ankle brace support system that allows for attaching or detaching a rigid high ankle/calf extension. The detachable posterior panel supports the calf in addition to the ankle, giving patients the option for added support above the ankle. Brace combines a soft fabric surround with a rigid foot plate and comfortable padding and provides advanced stability and improved support for ankle injury treatment. Lightweight, low-profile support helps prevent abnormal ankle inversion, eversion, and rotation while offering natural, unrestricted plantar-flexion and dorsi-flexion movement.

FEATURES

- Easily attachable/detachable rigid Plastic calf support with cushion
- Anatomically-contoured supporting shell with a hinge joint
- Rigid foot plate
- Adjustable advanced gripping material closure - adjusts to swelling changes
- Figure-of-eight straps provides ankle taping to enhance inversion/eversion support
- Hinge design for normal gait activity
- Specifically configured right or left by anatomical design
- Hand Washable

INTENDED FOR

Mild to moderate ankle distortions, Tibialis Tendinitis, Osteoarthritis of ankle and foot, Chronic ankle instability, Tendinopathy of foot and ankle; Prophylactic and therapeutic use in sport activities. Rupture - tendon of the foot and ankle, non-traumatic. Acquired flat-foot or pronation of the foot/ankle.

AFO Ankle Gauntlet

HCPCS: L1902

MODEL #: ISO-AN36x

The ISO Preferred AFO Ankle Gauntlet (AN36x) is an ankle orthosis which gives stability and protection for the ankle during recovery following an injury, or as preventative use for acute and chronic conditions. The low profile, lace-up design uses Figure-of-eight straps which replicate the effect of a professional taping procedure. The taping outcome keeps the ankle in a protected position and provides inversion/eversion support. A wide elastic band at the top of the brace with advanced gripping material provides compression and additional stability.

FEATURES

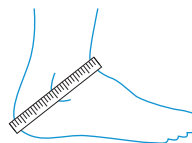

- Low profile design
- Universal side fits left or right
- Figure-of-eight straps provide ankle taping to enhance inversion/eversion support
- Wide elastic band at top of brace provides compression and additional stability
- Medial and Lateral Support helps reduce injury and assist recovery
- Lightweight fabric
- Easy application with advanced gripping material
- Hand Washable

INTENDED FOR

Acute and chronic ankle sprains, Chronic ankle instability. Osteoarthritis, Posterior tibial tendonitis, Peroneal tendonitis and Preventative use.

SIZING INFORMATION

SKU	SIZE	
ISO-AN360	Small	11"-12"

ISO-AN363	X-Large	14"-15"

The ISO Preferred AFO Ankle Gauntlet comes in 4 sizes. Sizes are determined by diagonal ankle circumference (Measure circumference diagonally from the base of the heel and across the ankle bone as shown). Consult the chart for correct size.

Night Ankle Splint with Wedge

HCPCS: L4396/L4397

MODEL #: ISO-AN37x

The ISO Preferred Night Ankle Splint with Wedge (AN37x) is a static or dynamic ankle foot orthosis designed for patients to aid in alleviating pain associated with plantar fasciitis and /or lower extremity overuse injuries. The splint provides a gentle overnight stretch and controls movement by positioning and stretching out the fascia, thus preventing the foot from tensing while sleeping. The adjustable, bilateral dorsi-flexion straps and optional toe wedge allow custom levels of stretch to meet the patient's needs and preferences.

FEATURES

- Apply to left or right ankle
- Lightweight construction
- Soft foam & spandex liner
- Adjustable padded ankle and calf straps
- Adjustable bilateral dorsi-flexion straps
- Optional toe wedge
- One piece plastic frame w/non-skid tread
- Easy application with advanced gripping material on straps and quick release snap buckles
- Hand Washable

INTENDED FOR

Plantar fasciitis, Achilles tendinopathy, Lower extremity overuse injuries, General heel pain, Heel spurs, Plantar Flexion contractures.

The ISO Preferred Night Ankle Splint with Wedge comes in 3 sizes for your convenience. The sizes are aligned with typical shoe sizes. To find your size, consult the chart.

AFO Foot Drop

HCPCS: L1930

MODEL #: ISO-AN38xx

The *ISO Preferred AFO Foot Drop (AN38xx)* is a plastic ankle foot orthosis devised as a stable and lightweight solution for individuals with mild to moderate foot drop that is secondary to Cerebrovascular accident (CVA) or Peroneal nerve palsy. The AFO Foot Drop features an ergonomic design that wraps and fastens around the calf/shin with a posterior framework and a front foot plate that can easily be trimmed for a custom fit. The ergonomic design supports the foot in the proper position providing daily walking protection and conveniently fits any laced shoe.

FEATURES

- Ergonomic design
- Specifically for right or left by anatomical design
- Easy to put on and remove
- Lightweight construction
- Adjustable advanced hook and loop system to secure
- Trimmable foot plate for custom fit
- Fits freely in any laced shoe
- Hand Washable

INTENDED FOR

Mild to moderate foot drop, Peroneal nerve damage, Post-Operative Achilles tendon healing, Acquired deformity of the foot and ankle, Severe spasticity.

Raptor Foot/Ankle Stabilizer

HCPCS: L1906

MODEL #: AB0003-149x-xx

The DR Medical Raptor Foot / Ankle Stabilizer (AB0003-149x-xx) is a low-profile lightweight open brace featuring a front closure with Velcro strapping. Designed to provide support and reduce the time it takes to heal discomfort from injuries or post-surgery. Brace combines support panels on each side of the ankle with a rigid foot plate and provides advanced stability and improved support for ankle injury treatment. Lightweight, low-profile support helps prevent abnormal ankle inversion, eversion, and rotation while offering natural, unrestricted plantar-flexion and dorsi-flexion movement.

FEATURES AND BENEFITS

- Lightweight, durable design for extended wear.
- Slender design provides ability to wear with shoe.
- 3 strap adjustment for a more custom fit.

INDICATIONS

- Stabilization of the ankle
- Ankle injury rehabilitation
- Sub-acute ankle sprains
- Chronic ankle instabilities

Dorsal Night Splint

HCPCS: L4398

MODEL #: ISO-AN39x

The ISO Preferred Dorsal Night Splint (AN39x) is a foot drop splint and recumbent positioning device. It is designed to hold the foot in an upright position, approximating a 90-degree angle while sleeping. The ISO-AN39x provides a gentle steady stretch to the plantar fascia, Achilles tendon and calf muscle and is designed to provide strong support and pain relief throughout the night. The lightweight, low profile open heel style produces less heat retention during the night. An air bladder located at the top of the foot adds to the patient's comfort. The splint can be worn with or without a sock and fits the right or left foot. The adjustable advanced hook and loop system secures the calf and foot straps, is easy to use and results an optimum fit.

FEATURES

- Universal design fits left or right foot
- Low profile
- Non-slip tread on foot strap bottom
- Less heat retention during sleep
- Lightweight construction
- Adjustable advanced hook and loop system to secure
- Air bladder for patient comfort
- Can be worn with or without a sock
- Hand Washable

INTENDED FOR

Plantar fasciitis, Drop foot, Achilles tendonitis, Heel pain, Arch foot pain.

Gel Stirrup Ankle Brace

HCPCS: L4350

MODEL #: ISO-AN400

The *ISO Preferred Gel Stirrup Ankle Brace (AN400)* is an ankle control orthosis designed for patients who require minimal ankle rotation and inversion/eversion. The rigid frame provides medial/lateral protection and support, minimizing ankle rotation. Attached to the interior of the rigid frame are air/gel pouches. The upper pouches are pre-inflated with air and the lower pouches are filled with gel. The air pouches assist to secure the foot and provide an appropriate fit. The air/gel pouches can be placed in the freezer for cold therapy.

FEATURES

- Apply to left or right ankle
- Anatomically-contoured plastic frames control inversion or eversion
- Swivel straps allow even compression when applied in opposite directions
- Lightweight construction
- Adjustable advanced hook and loop system to secure
- Air/Gel pouches can be placed in freezer for cold therapy
- Adjustable heel strap for effortless width adjustments
- Easy application with advanced gripping materials on straps to secure
- Low profile structure fits freely in any laced shoe
- Hand Washable

INTENDED FOR

Mild to moderate ankle distortions, Chronic ankle instability, Osteoarthritis, Syndesmosis sprain, Prophylactic use, Post-cast and post-walker support, Ankle injury rehabilitation and/or Post-surgical use.

Air Walking Boot

HCPCS: L4361

MODEL #: ISO-FT35x

The ISO Preferred Air Walking Boot (FT35x) offers comfort, stability and performance using air compression inside a rigid frame to provide customized support. The pneumatic lining system in the boot provides variable compression adjustments to help manage the support needs throughout the healing process. The unique property of air compression is the ability to make as-needed adjustments to accommodate swelling, improve stability and decrease pain. The rigid Plastic frame offers durability while the interior air bladder uses an embedded air pump to provide advanced support and convenient comfort. The Advanced Gripping Material on the fastening straps offers convenient on/off application and the low-profile rocker bottom assists in maintaining a natural gait and improved wearability. The Air Boot is for either the left or right foot and fits women's shoe sizes 6-15+ and men's shoe sizes 4-13+.

FEATURES

- Lightweight Design
- Rigid Plastic side stays to provide substantial stability
- Adjustable advanced gripping material closure straps for proper tightening
- Imbedded air pump and valve design for easy application and adjustments
- Curved rocker bottom gives natural and normal gait
- Full Cover Liner for better comfort
- Hand Washable

INTENDED FOR

Is intended for use post-foot or ankle surgery, Fixation after stable foot or ankle fracture, soft tissue injuries and to stabilize the ankle or foot after a Grade II & III sprain.

SIZING INFORMATION

Walking Boot I

HCPCS: L4386/L4387

MODEL #: ISO-FT36x

The ISO Preferred Walking Boot (FT36x) is a non-pneumatic foot and ankle brace designed to reduce the time it takes to heal discomfort from soft tissue injuries, post-surgery, Grade 2 and 3 sprains, trauma and rehab. The boot has a soft, cushioned inner liner and outer support uprights. The curved rocker bottom is constructed to promote a natural and normal gait. A closed heel provides additional foot protection. Models are universal left or right foot; sizes are S to XL. If additional padding is necessary to cover a sensitive area or achieve a more secure fit, optional spacer pads are provided.

FEATURES

- Low profile design
- Apply to left or right foot
- Soft padded inner liner
- Outer plastic uprights
- Adjustable advanced hook and loop system to secure
- Curved rocker bottom for natural and normal gait
- Non-skid tread on sole plate
- Closed heel design for foot protection
- Optional spacer pads for additional comfort or a more secure fit
- Hand Washable

INTENDED FOR

Soft tissue injuries, Stable foot or ankle fractures, Post operative use, Grade 2 and 3 sprains, Trauma and Rehab.

Airmaxx Cam Walker Low Top

HCPCS: L4360/L4361

MODEL #: AB0004-128-xx

The DR Medical AirMaxx CAM Walker Boot (AB0004-128-xx) is engineered to accelerate the healing process and to reduce the body's recovery time. It is carefully designed to protect the body while providing superior comfort and support.

FEATURES AND BENEFITS

- Inflatable bladder incorporated into the liner for increased immobilization of the lower leg, ankle, and foot
- Specially designed toe guard for added protection
- Cushioned sole for greater energy absorption
- State of the art design provides greater protection without sacrificing wearer comfort
- Fits right or left foot

INDICATIONS

Used for soft tissue injuries, grade 2 and 3 sprains, stable fractures, and post-operative stabilization. Helps to reduce pain, swelling and edema of foot and ankle

Wrist Bracing

ISO Preferred and DR Medical wrist braces are designed to provide support for wrist injuries (ligament instability, sprain or muscle strain), post-operative use, and post-removal of casting or splint.

Constructed of lightweight, breathable yet durable material, our wrist braces control wrist movement with or without ROM control while allowing full finger dexterity. Left or Right or Ambidextrous anatomically contoured fit and hand washable for easy care.

Wrist Splint Neutral Position Stabilizer: Universal Shown

Wrist Splint Neutral Position Stabilizer: Universal

HCPICS: L3915/L3916

MODEL #: ISO-WR301

The *ISO Preferred Wrist Splint Neutral Position Stabilizer: Universal (WR301)* is a universally sized wrist orthosis with rigid support to immobilize the left or the right wrist. Unique Range of Motion (ROM) cuff hinge setting allows the brace to adjust and stabilize the wrist position for optimum support and healing. Universal size and ambidextrous design fits most patients. Brace features a malleable frame and an attached interior glove offering comfort, support, and pain reduction to help reduce the time it takes to heal from injuries or post-surgery. Lightweight and breathable material with multiple advanced grip straps to secure in place.

FEATURES

- Ambidextrous
- Hinged ROM control for flexion/extension
- ROM ranges between 0°-35° of flexion and extension
- Facilitate the healing of soft tissue injuries and fractures
- Interior attached glove for comfort
- Prefabricated supporting splint with anatomical shape
- Hand Washable

INTENDED FOR

Can be worn on either hand and is a splint that provides neutral position stabilization and is intended for the prevention of finger and wrist contraction while assisting with flaccid paralysis, soft tissue contracture management, nerve injury, arthritis, and the support of weak or damaged parts of the forearm. With its unique ROM cuff hinge is excellent for wrist/hand ailments that may require Flexion/Extension control. Also intended for surgical repair and after cast management.

Wrist Splint Immobilizer

HCPCS: L3908

MODEL #: ISO-WR31xx

The *ISO Preferred Wrist Splint Immobilizer (WR31xx)* is a lightweight, low-profile wrist extension brace that features a rigid support carriage with advanced gripping straps to ensure secure, stable support. The strapping closures allow easy application, compression adjustment and removal. The breathable material is intended to provide airflow to improve comfort and wearability over long periods of use.

FEATURES

- Rigid sculpted support with adjustable compression
- Anatomically-contoured aluminum palmar splint
- V-notch at fifth MP for palmar spread
- D-ring closure for optimum fit, compression and support
- Lightweight fabric
- Narrow webspace prevents pinching
- Ventilation for wearable comfort for long periods of time
- Easy on/off
- Breathable material with terry-lined interior
- Hand Washable

INTENDED FOR

Carpal Tunnel Syndrome, Osteoarthritis, Wrist instability due to triangular fibrocartilage complex (TFCC) injury, Radial nerve paralysis, Rheumatoid arthritis, DeQuervain’s Disease, Smith’s fracture, Fracture of the shaft, Sprains and strains of the wrist and hand.

Advanced Wrist with Thumb Splint

HCPCS: L3807/L3809

MODEL #: ISO-WR32xx

The *ISO Preferred Advanced Wrist with Thumb Splint (WR32xx)* is a rigid but malleable orthosis recommended when immobilization of the wrist and/or thumb is needed. Medial thumb stay provides immobilization and thumb abduction. This unique “v” shaped metal thumb stay/immobilizer and adjustable strapping system supports the thumb during the healing process. The metal palmar stay stops just short of the distal palmar, allowing full range of motion for the fingers. This metal palmar stay coupled with the plastic dorsal stays prevent flexion and extension, providing both protection and immobilization. Multiple hand and wrist closure straps control and stabilize overall mobility. Breathable mesh material promotes airflow and wicks moisture away from the skin for increased comfort. Tubular construction allows for quick and easy one-handed application, once the patient has been fitted for the brace.

FEATURES

- Unique adjustable thumb immobilization feature
- Malleable palmar stay
- Removable thumb and palm aluminum stays
- Non-removable dorsal stays
- Easy to apply
- Breathable mesh fabric promotes airflow; wicks moisture away
- Hook and loop straps with D-ring closures
- Tubular design for easy on/off
- Advanced gripping materials to secure
- Hand Washable

INTENDED FOR

Post-surgical treatment of wrist and thumb injuries, especially for the treatment of Basal Joint Arthritis, DeQuervain’s Tenosynovitis, Skier’s thumb, Carpometacarpal instabilities, tendonitis, accumulative trauma disorders of the thumb and wrist, strains/sprains of the thumb joint (MCP), advanced Carpal Tunnel Syndrome, and after cast removal.

Thumb Spica I

HCPCS: L3923/L3924

MODEL #: ISO-WR33x

The *ISO Preferred Thumb Spica I (WR33x)* is a hand finger orthosis, without joints which limits the motion of the wrist while a rigid splint/stay on the outside of the thumb gives considerable stability for the Carpometacarpal (CMC) and Metacarpophalangeal (MCP) joints of the thumb and allows full range of motion for the fingers. The one-hand wraparound design provides ease of use and incorporates a wide hook and loop strap with buckle around the lower wrist for additional stability.

FEATURES

- Apply to left or right wrist
- Easy on/off application
- Lightweight construction
- Adjustable advanced hook and loop system to secure
- Rigid splint stabilizer on outside of thumb
- Full range of motion for fingers
- Covered soft fabric which provides comfort at night/sleeping
- Hand Washable

Orthotic Heel Cups

HCPCS: L3170

MODEL #: ISO-OR10x

The ISO Preferred Orthotic Heel Cups (OR10x) come as a pair and features high quality silicone molded construction with soft areas at the heel to stabilize the heel, to help relieve tension, reduce pain, and minimize fatigue in the feet, legs and back. In addition, the shock absorbing soft silicone heel cups cushion the heels and help reduce shock and vibration loads to leg and knee joints. These silicone gel heel cups come in pairs and can be worn in most shoe styles including dress, casual and athletic footwear.

FEATURES

- High Quality Shock Absorbing Gel Construction
- Heel Stabilizer
- Soft Cushion for Heel Areas to Reduce Pain
- Provides Superior Relief for Tender Heels and Standing Long Hours
- Includes One Pair (fits either Left or Right foot)
- Hand Washable

INTENDED FOR

Intended to provide relief by using a soft silicone gel interior to help with Plantar Fasciitis, Achilles tendonitis and Calcaneal (heel) spurs. Due to the excellent shock absorption features, the heel cups provide relief for arthritis in the leg and joint and help reduce shock and vibration to the joints; provides relief for long hours of standing.
